

CHAMBERLAIN GETS CHANCE IN HEARING

Prosecution Rests In Investigation of Air Case at Paris and Defense Will Take Stand.

BENSON REQUESTS SPEED

American Naval Chief Says International Character Prompts Quick Decision and Full Justice.

RAPS PUBLIC OPERATION OF U. S. SHIP SERVICE

HOBOKEN, N. J., April 16.—Operations of the naval ship shipping board are neither economical nor efficient, Commander C. C. Gill, flag secretary of the Vice Admiral Gleaves of the cruiser and transport forces, told the local chamber of commerce today in an address in which he favored temporary administration of the merchant marine by the government. He also favored private ownership of large carrying vessels acquired by the government during the war period.

Commander Gill considered ultimate private operation of the merchant marine inevitable because the ship shipping board's management had been unsatisfactory.

NEXT ROYAL ARCH MASON MEETING GOES TO CAPITAL

Special to The World.

MCALISTER, Okla., April 16.—The grand chapter 25th Royal Arch Masons adjourned here this afternoon to meet in Oklahoma City on the third Tuesday in April, 1920.

The following officers were appointed: Charles E. Long, Douglass grand master; C. W. Johnson, grand treasurer; W. H. Noddy, fraternal correspondent; McAlester.

The grand council Royal and Select Master Masons convened in final session at 2 o'clock with a full attendance of officers and delegates.

The degrees of royal sons, and the most exalted master degree were conferred upon a class of 32 candidates in Masonic temple of Mount Moriah.

The officers for the ensuing year will be elected tonight. The grand commander knights templar will convene in the morning for a one day session.

FORMER CRAIG COUNTY OFFICIAL DIES IN VINITA

Special to The World.

NEW ORLEANS, April 16.—Charles Joseph McGuire, former Craig county and former assessor of Craig county died here this afternoon of blood poisoning caused by a carbuncle. Hartmann came to Tulsa 20 years ago from Wichita, Kan., and has been a leader in local democratic circles. He was a prominent Odd Fellow. He leaves a wife, two sons, Charles and Hubert Hartman, and one daughter, Mrs. Walter Love. He was 52 years old.

ASK RELIEF ON OIL FREIGHT RATES

CONTINUED FROM PAGE ONE

elles seriousness of conditions of Oklahoma independent refineries by reason of the discrimination. Many independent refiners in Oklahoma are dependent on crude oil shipped from Texas points in tank cars. By reason of this discrimination they are being forced to cut their capacity and reduce the number of employees.

The state administration, chamber of commerce and city and administrations in Oklahoma are engaged in action. Immediate relief is anticipated necessary.

Would it be possible for you to include Oklahoma in your itinerary and give these people a hearing, or if it is impossible for you to go to Oklahoma you can name some city you are in visit where ever you can meet you.

Mr. Ferry, in his telegram said that the freight rate from Muskogee to Kansas City, a distance of 400 miles is 78 1/2 cents from Muskogee to Oklahoma City, a distance of 178 miles, the rate is 72 cents from Muskogee to Oklahoma City, a distance of 299 miles the rate is increased to 100 cents. The original rate is 24 cents a barrel from Muskogee to Shreveport, La., a distance of 362 miles the rate is 34 cents per barrel, and from Wichita Falls to Shreveport, a distance of 25 miles the rate is 34 cents a barrel.

Mr. Ferry said appears have been made to the railroad administration in Washington and the branch offices in Chicago and St. Louis with no result.

The level of the Caspian sea has been gradually sinking for a number of years until navigation has been impeded at several points.

Inflatable shoe trees, which can be inflated with an air pump, have been invented for keeping footwear in shape when not being worn.

HINES INSISTS RAIL IMPROVEMENTS GO ON

DIRECTOR GENERAL Says Price Disagreement Will Not Retard Progress in New Construction

CHICAGO, April 16.—Walker D. Hines, director general of railroads, addressing the National Lumber Manufacturers' association today, said he wanted it clearly understood that, although he had refused to accept the schedule of steel prices recently announced after conferences with the federal industrial board and representatives of the steel industry, the railroad administration was going ahead making necessary purchases in every line of industry.

He said the railroads had agreed to pay the cost of armament, the skulls and bones of men lay in the underbrush and under the barbed wire entanglements. It was there in Belgian wood that our American boys made their stand a place where it seems macabre that a single one of them should have escaped death. It was there that the American fatigues of the French and the Italian and the British and drove the German back until they begged for an armistice.

That armistice turns out to have been what in military etiquette simply means unconditional surrender.

That was the end as far as German resistance was concerned and it took place at 11 minutes before the 11th hour of the 11th day of the 11th month of the year. I don't know what would seem to be to that sort of words like march like "some 7-11" to the Germans. The end of gallantry has come, continued the speaker. The end of the case of the man who may call this a socialist act, but the socialists haven't any copyright on it and I am going to borrow it I believe in keeping him.

LOAN TO BRING SOLDIERS HOME

CONTINUED FROM PAGE ONE

to turn back and defeat was changed.

There has been an almost battlefield-like the scene. There were hundreds of little groups along the road that I traveled out of them were draped American flags setting where some American boy had fallen. The ground was pitted with shell holes so thick that the edge of one shell hole touched the edge of another probably as many as 10,000 holes to the acre. Not a tree was left standing.

There were zigzag trenches everywhere, gun emplacements, the shells and bombs of armament, the skulls and bones of men lay in the underbrush and under the barbed wire entanglements.

It was there in Belgian wood that our American boys made their stand a place where it seems macabre that a single one of them should have escaped death.

It was there that the American fatigues of the French and the Italian and the British and drove the German back until they begged for an armistice.

That armistice turns out to have been what in military etiquette simply means unconditional surrender.

That was the end as far as German resistance was concerned and it took place at 11 minutes before the 11th hour of the 11th day of the 11th month of the year. I don't know what would seem to be to that sort of words like march like "some 7-11" to the Germans. The end of gallantry has come, continued the speaker. The end of the case of the man who may call this a socialist act, but the socialists haven't any copyright on it and I am going to borrow it I believe in keeping him.

new ways. Had we ruined our nation before we put our country back into its normal activities? We had 1,000,000 people engaged in breaking up industries and these had to be placed in peaceful pursuits.

"We are bringing our soldiers back at the rate of 10,000 a day. The roads are rough and the lives of the soldiers have to be safeguarded. We have to make additional efforts to have one of these roads go down with one shell. I have been on the ocean and I know what a hazard it is at this time of the year and I think the government is doing mighty well getting them back every day.

I am anxious to get our soldiers back as soon as possible, every one of them. I am not in favor of having any of them in Russia. Believin' Wilson will burn us out. It is a terrible thing, but the Russian people will never learn anything about democracy. They are still living in the stone age. They are teaching the Germans how to behave. They are still fighting.

The way to prevent trouble in this kind in America is to increase the country bus, provide good jobs for everybody. If there are no jobs create them. Build good roads. It would be in favor of starting a government cement plant and building roads. That would be for everybody that does have a home. Some people may call this a socialist act, but the socialists haven't any copyright on it and I am going to borrow it I believe in keeping him.

We have got to recondition this country along peace lines. In England they have committees at work studying industrial and economic problems and they are planning to do many things that have not been done before.

We have got to put America back into production again and have to fill the seas with our products. We carry our summers into every part of the world. You may not know it, but gasoline is selling in Madrid, Spain, for \$1.20 a gallon and olive oil at \$1.15. Europe has

plenty of money. They are no more bankrupt than we are.

We established a League of Nations in 1919 and send 2,000 men to France with one purpose, to settle the Russo-French war. We didn't call it a League of nations then. It was the associated nations, but it is all the same. What are Orlando, Cleveland, Lloyd George and Wilson doing over here in Paris? They are trying to make a new map of Europe. They are making the map to repair the damage it has done to poor devastated Belgium and to the other countries in that area.

It is a good thing that Woodrow Wilson is there. France had suffered severely, troops was upon her every day. 1,000,000 men had been killed and between 2,000,000 and 3,000,000 more were maimed by wounds, so to speak. These are all terrible things, but the Russian people will never learn anything about democracy. They are still living in the stone age. They are teaching the Germans how to behave. They are still fighting.

The way to prevent trouble in this kind in America is to increase the country bus, provide good jobs for everybody. If there are no jobs create them. Build good roads. It would be in favor of starting a government cement plant and building roads. That would be for everybody that does have a home. Some people may call this a socialist act, but the socialists haven't any copyright on it and I am going to borrow it I believe in keeping him.

The world is weary of war and wants peace. We can make peace absolutely sure by having an understanding between the great nations of the earth that there will be no war. It is easier to educate before going into war. The plan for peace is to have a League of Nations and to disintegrate in colonies and we are better for it. The way to stop war is to make war a crime. When the Constitution comes back from Paris it will meet the approval of the American people.

At the conclusion of this statement Senator Owen asked those in

the audience who favored an understanding between the nations that there should be no more war to hold up their hands. A great many hands went up. He then called for a vote of expression and only four hands went up. The audience voted that the question was not voted. As far as I can see, the League of Nations as outlined in the Constitution was favored.

SUFFERED WITH RHEUMATISM, CATARRH AND STOMACH TROUBLE

I think Number 40. For the mind as a blood purifier has no equal. When I began to use "Number 40" I was in very poor health.

I had Rheumatism, rheumatism, gout, sciatica, neuralgia, etc. I had Troubles, Lead Poisoning and an Ulcer that I had tried almost every known remedy in science. It was given to me by a friend, Dr. Klinke, who said it was a good thing that Woodrow Wilson is there. France had suffered severely, troops was upon her every day. 1,000,000 men had been killed and between 2,000,000 and 3,000,000 more were maimed by wounds, so to speak. These are all terrible things, but the Russian people will never learn anything about democracy. They are still living in the stone age. They are teaching the Germans how to behave. They are still fighting.

This war has established some great evils. It has been won by the United States. It has established liberty forever. It has saved civilization. We will never have any more dental or

urotic diseases. The ingredients in "Number 40" are: 1. Zinc, 2. S. S. Dispensary and other valuable medical books as follows: "Employed in Diseases of the Glaucoma System in Blood Poisons, Constitution, Skin, Heart and Liver, Chronic Rheumatism, Catarrh, Sore Throat, Skin eruptions, Rheumatic and Cardiac Diseases, and other diseases, such as scrofulous swellings that have withstood all other treatment disappear as if by magic."

Prepared by J. C. Mendenhall, Gadsden, Ind., 16 years a druggist. Sold by Steinberg Bros. Mail order \$1.25 per bottle, 6 bottles sent prepaid for \$7.00—Adv.
